/ ALL ABOUT ME

I have more than 15 years of experience in the web development industry. I have worked at both big agencies and remote teams, as well as for festival staff and as an independent freelancer.

I have extensive experience with the technical skills required to do my job, as well as the soft skills—such as communication and time management—that enable me to work effectively with clients and other team members.

My career has been challenging and rewarding. I have learned a great deal and have enjoyed expanding my skills and knowledge base.
